Change in Policy for Those in Self Isolation who wish to visit relative at end of life

Due to the current low disease transmission and the number of requests for those in self-isolation who wish to see a dying relative (who is actively dying), Chief Medical Officer of Health Dr. Janice Fitzgerald is approving these compassionate visits provided:

1. The visitor is asymptomatic
2. The visitor wears a mask and maintains physical distancing with others they encounter in the facility
3. The relative is actively dying
4. The visitor abides by all other associated policies of the facility
