

We are...

Eastern HEALTH

Built on a solid foundation

We are a new organization created from seven former health care organizations

- Health and Community Services St. John's
- Eastern Health and Community Services
- The Health Care Corporation of St. John's
- Peninsulas Health Care Corporation
- St. John's Nursing Home Board
- Avalon Health Care Institutions Board
- Newfoundland Cancer Treatment and Research Foundation

We are 12,000 strong, and we are part of your community - we live and work where you live and work.

By coming together as one integrated organization, we can better meet all of your health care needs - improving the health of our communities, diagnosing and treating illness, and providing long-term care.

We are working together...

- For healthy people, healthy communities
- In your community, our province and across Canada
- Ensuring you receive the best possible care

More about Eastern Health

- We are the largest integrated health organization in Newfoundland and Labrador
- We serve a population of more than 290,000 people, extending from Port Blandford east to St. John's including the Bonavista, Burin and Avalon Peninsulas. We also offer unique programs & services to the entire province.
- We operate more than 80 hospitals, health care centres, long-term care facilities and community health offices.
