Update on PPE for Private Community-based Physicians

Today, the NLMA received confirmation from the Department of Health and Community Services that it will distribute PPE to private community-based physicians through the regional health authorities. The RHAs will have kits of PPE available per community physician office for pick up. The kits will contain gowns, gloves, surgical and procedural masks and goggles or face shields (the patient should wear the procedural mask). When the PPE is used, it can be replaced. NLMA will provide more details to members about how to access this PPE when the process is finalized.

*Representing and supporting a united medical profession and providing leadership
in the provision of excellent health care in Newfoundland and Labrador*
