Update on PPE for Private Community-based Physicians

The Department of Health is continuing to plan for distribution of personal protective equipment to private fee-for-service clinics. NLMA does not have any details at this time on how physicians will apply for and obtain this PPE. Yesterday, at the Department's request, the NLMA provided the government with a list of all community clinics, as well as all community-based specialists and family physicians.

*Representing and supporting a united medical profession and providing leadership
in the provision of excellent health care in Newfoundland and Labrador*
