### Changes to PPE supply for community-based FFS physicians

In May, private community-based physicians were granted temporary access to personal protective equipment (PPE) from the regional health authorities' PPE inventory. This program has now ended. The Department of Health and Community Services has developed a new process for community-based fee-for-service (FFS) physicians to purchase their own PPE from private vendors. The Department of Health has awarded a contract to **Seafair Capital** and **Bio Nuclear** to supply this PPE at competitive prices for private health care providers (physicians, dentists, etc.).

Seafair Capital is providing **N95 respirators, hand sanitizer and disinfectant wipes**. Bio Nuclear is providing **gloves, gowns and masks**.

To learn more about pricing, placing orders and for a full list of other vendors supplying PPE in Newfoundland and Labrador and throughout Atlantic Canada, please visit <http://www.nlma.nl.ca/Page/COVID19>
